Department of Computer Science and Engineering

Seminar Proposal Form

CSQ 413 SEMINAR BATCH 2023-2027

Name & Reg No. of Student:

AQUIL V K (SCM23CS071)

ARJUN M U (SCM23CS072)

ASWIN KRISHNA N S (SCM23CS079)

JOHN ANTONY (SCM23CS135)

Class: S7 B.Tech CS

Date: **13-06-2026**

1. Area of seminar topic: Blockchain Technology, E-Governance, and Public Fund Transparency

2. Title of Seminar: TransparentGov: Blockchain-Based Public Fund Transparency and Accountability Platform

3. Literature Referred (List out five referred journal papers from year 2019 to 2026)

Sl No	Journal Name	Paper Title	Authors	Month & Year	ISSN/ Issue/Volume	Page No
1	2024 2nd International Conference on Artificial Intelligence and Machine Learning Applications (AIMLA)	Government Fund Allocation and Tracking System Using Blockchain Technology	Chinnam Prudhvi Krishna, Gade Ajay Reddy, T. Venket Babu	May 2024	DOI: 10.1109/AIMLA59606.2024.10531515	1–4
2	IEEE Transactions on Engineering Management, Volume 72	Transforming e-Participatory Budgeting With Blockchain: Boosting Transparency and Citizen Engagement	Mohammad Mustafa Ibrahimy, Alex Norta, Peeter Normak, Hadi Nowandish	April 2025	**DOI:** 10.1109/TEM.2025.3556191	1376 – 1403
3	2025 IEEE International Conference on Blockchain and	Generating Efficient and Semantic Interoperable Smart Contracts	Sokratis Vavilis, Harris Niavis, George Misiakoulis,	June 2025	DOI: 10.1109/ICBC64466.2025.11185103	1–4

	Cryptocurrency (ICBC)	for e-Governance	Panos Protopapas, Konstantinos Loupos			
4	2025 7th International Conference on Blockchain Computing and Applications (BCCA)	Blockchain-Based Framework for Automated and Accountable Public Procurement	Vehbi Neziri, Adnan Imeri	October 2025	DOI: 10.1109/BCCA66705.2025.11229478	**867–872**
5	2024 9th International Conference on Smart and Sustainable Technologies (SpliTech)	A Blockchain-Based System with Anomaly Exclusion Method to Enhance Transparency and Fairness in Italian Public Procurement	Mohamed Abdelhai Bouaicha, Teodoro Montanaro, Noureddine Lasla, Valeria Vergine, Ilaria Sergi, Luigi Patrono	June 2024	DOI: 10.23919/SpliTech61897.2024.10612625	**105–110**

4. Seminar Abstract: (Minimum 250 words)

Blockchain technology has emerged as a promising solution for improving transparency, accountability, and efficiency in public administration. Traditional government fund management and procurement systems often rely on centralized databases and manual verification processes, which may lead to delays, lack of transparency, data manipulation, corruption, and reduced public trust. Citizens generally have limited visibility into how public funds are allocated and utilized, making it difficult to ensure accountability in governance.

This seminar presents **TransparentGov: A Blockchain-Based Public Fund Tracking and Citizen Monitoring System**, which aims to enhance transparency and trust in government financial operations. The proposed system leverages blockchain technology to create a secure, decentralized, and tamper-resistant platform for recording fund allocation, expenditure, and procurement activities. Every transaction is permanently stored on the blockchain, ensuring data integrity and enabling real-time verification.

The system utilizes smart contracts to automate fund release, procurement validation, and compliance monitoring. This reduces human intervention, minimizes administrative errors, and improves operational efficiency. Citizens, government authorities, and other stakeholders can access transparent records through a monitoring dashboard, enabling active participation and oversight of public projects. The proposed framework also strengthens auditing capabilities and helps prevent unauthorized modifications or misuse of public funds.

The seminar is based on recent IEEE research papers focusing on government fund tracking, blockchain-enabled procurement systems, participatory budgeting, smart contracts, and e-governance applications. These studies demonstrate the effectiveness of blockchain in improving transparency, reducing corruption, enhancing citizen engagement, and strengthening trust in public institutions. The proposed approach provides a secure and accountable governance model that supports efficient fund management and promotes transparent public administration in the digital era.
